Title: Perfect score: Sequence:

Run on:

US-09-676-718A-1 162 1 MAAGPSGCLVPAFGKRLLLA......ILKWNTDSVEEFLSEKLERI 162

Scoring table: OLIGO Gapop 60.0 , Gapext 60.0

Searched: 105224 seqs, 38719550 residues

Total number of hits satisfying chosen parameters: Word size :

105224

Minimum DB seq length: 0
Maximum DB seq length: 2000000000

Post-processing: Listing first 45 summaries

Database :

SwissProt_40:*

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 leic Acids Res. 18:4617-4617(1990).

FUNCTION: THE CD3 COMPLEX MEDIATES SIGNAL TRANSDUCTION.

SUBUNIT: THE TCR/CD3 COMPLEX OF T LYMPHOCYTES CONSISTS OF EITHER A TCR ALPHA/BETA OR TCR GAMMA/DELTA HETERODIMER COEXPRESSED AT TI CELL SURFACE WITH THE INVARIANT SUBUNITS OF CD3 LABELED GAMMA, DELTA, EPSILON, ZETA, AND ETA.

SUBCELLULAR LOCATION: Type I membrane protein.

SUBCELLULAR LOCATION: TYPE INVANIOGLOBULIN SUPERFAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     s SWISS-PROT entry is copyright.
